

# ROBERT BRUCE THOMAS

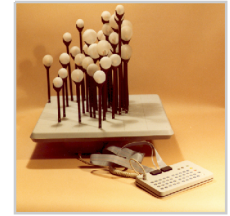

- Industrial Designer
- Hacker
- Artist
- All of the Above

Present

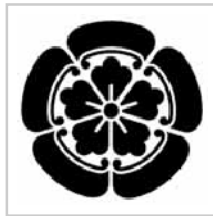

Progress

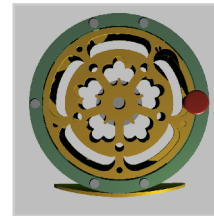

Produce

An Industrial Designer since the age of 5, Rob started out supplying his ragtag band of alley rats with his own Flash Gordon-inspired weapons sketched out on scraps of wood for his grandfather to cut on his band saw. He went on to design products, packaging, displays and exhibits for Fortune 500 clients, including the original prototype of the IBM PC!

A client of his once said "While the rest of us go home and watch TV, Rob goes home and designs a new TV!".
